

My Voice in America's Democracy

As a thirteen year old, I believe there needs to be freedom for other kids that come here. Other kids in other countries need freedom because they have rural areas so let them come to America and let them be free from all their chaos that they have been through. I would give them a break for what they have been through. People should come to America so they can have freedom like us. Other countries don't have freedom but they deserve freedom. Like we do.

All countries have rules but we don't except don't break the law but in other countries like Russia the men there have the right to kill their wives and women are illegal in Russia and Ukraine has the right to abuse their wives and kids. So we should let them come here, let them be free for once like one rule in China is they have screen time but we don't.

The husbands should stop abusing their wives and kids like that's not ok. The husbands should get treated like a dog and a slave put them to work on a farm like I do. If I were their president I would work them like a dog on an 800 acre farm. They should learn their lesson. But if they don't I would put them in the military so they could get yelled at like they yell at their wives and kids. So I would not kill them but put them through a lot like they put their wives and kids through and I would give the wives and kids a break from torment and abuse.

And the world needs more peace but as the word of god says there will never be peace in the middle east and Psalms 118:6- says faith over fear if you ever feel like you're not enough talk to god he is with you wherever you go so if feel like you need to tell somebody something talk to god he just wants a little bit of your time give him that time to talk to you talk to he gives you a choice you can be saved and go to heaven or you don't have to follow him he doesn't want your life he wants your heart. So follow him please he wants you to be with him and say god

As a kid I have the right to hunt, fish, play baseball, football, basketball, go to school, and hang out with my friends, be in youth groups, have a youtube channel, and have the best family. So yeah that's my voice in America's Democracy.
