

My Voice in America's Democracy

My voice in America's democracy is important to the nation and especially me. My voice in democracy can include- Voting, (Electing), Protesting, Boycotts, and speeches. Our voice in America's democracy will be heard when best as an adult. Because you get to vote. Voting is important because you're electing a representative, (Leader) of the US.

My voice and others can change things in significant ways. We can change anything and we know it, Just like we protested to end vietnam, and it was ended. (1975), That is a voice. Having the rights and freedom to speak out about anything you disagree with, There are many examples of free speech of things we don't like, as i stated, Vietnam war, Blackwater, etc. Many more things I can go on about just say that the voice in democracy is strong.

We have the power to criticize the government, And others without consequences. Maybe some hate from people that disagree. But not jail time, labor and execution. This shows how strong my and your voice is. As I stated, you can say whatever you want in this country, just not threats, etc. Our voice is how we stopped racism against blacks, our voice is how we stopped vietnam, it's also how we stopped apartheid. This is a voice, Not just voting, boycotts and protesting.

We can also use social-media to spread messages. In the UK they can't do that, due to the riots happening around the country. Social-media can influence people to speak out too. Using their voice to protest online basically.

If we all can stand up for one purpose, we should. This is a democracy, being able to speak out about things that tire you. Social media can get that done as well. It can be crucial to spreading word about voting like it is this election. Social media gives me the power to also do what I can't do in real-life.

So, my conclusion is that yes, we have a voice. And we can change the world with it. So, just do it. You have a voice, and power to change the world.
