My Voice in America's Democracy

We have a lot of rights in America, some of the freedoms you and I have are freedom of speech, freedom of press, and you and I have voting rights if we are 18 and above. Democracy guarantees freedom of the people and its elections to find the leader of our country.

There are many men and women who fought for our freedom and this country. Some examples are the white sniper during World War 2 who killed over 500 people using just a sniper and he was risking his life and fighting for freedom.

Also we can use social media to influence getting more freedom and getting more people to vote in the election. We can get more people to vote for their leaders in their country and try to influence them by being patriotic about their country and trying to spread democracy. There's also symbols of patriotism such as the National Anthem in the United States that symbolizes American freedom from the British and for those who fought for our country.

There was some moments in history when we did not have freedom for around 170 years as we were controlled by the British and we felt like it was unfair some of the laws they had so we went to war for freedom of the British and we won proving we wanted freedom and peace so if we did not win that we could possibly still be controlled by the British.

Some of my brothers and sisters are in the army so I am very grateful that they are patriotic about our country and so am I. They are fighting for our freedom and we are glad to be a citizen of the United States. Also my step dad served in the Army as a medic so he saved people's lives during combat showing that he fought for freedom.

That is why I believe that freedom and democracy are very important and I am grateful that my country has both freedom and democracy and that people are actively fighting for our country and freedom.
