

## My Voice in America's Democracy

A way I feel free in America is, saying what I want to say whenever I want to say it. Also to feel safe in my home and not worry about threats all the time as other countries would. I feel the freedom to defend myself with weapons.

Some ways I can help democracy are I can put up a poster talking about how we can help democracy in the u.s. I can help my community and my friends with homework or just general cleaning.

When I am older I could serve in the military. Serving my country is a good way to keep people safe from war. I thank the military for keeping everyone safe.

Democracy is a good process for our country. If we did not have democracy we might not be free and do what we want or need to do.

Us as a community can help people young or old. By entertaining them or singing Christmas carols at Christmas time. If we did not have people to entertain us we would be bored and the world would not be fun.

A World War II soldier who was in the battle of Hacksaw Ridge and he was a battle medic. When he was in battle he saved over 75 lives. He was saying only 7 words and they were "please Lord let me get one more" as in one more person. In that process he used a deadman to protect himself from Japanese soldiers. The soldier I was talking about was Desmond Doss and there was a movie about him called Hacksaw Ridge.

In conclusion when the world changes and you get older just know that everything will be ok. It's hard to live on your own so have someone to help you. Have fun, laugh, go on vacation and if you do relax and enjoy it. This was a paper about my voice in America's democracy.
